JAS Oceania Australia with the recent release of the Prestolite Alternators has also introduced a popular range of Starter Motors to complement the Alternator Program.

This includes a popular range of Power Pro 7.0 to replace 39MT Delco range of Starters for Cummins/Caterpillar Engines. Kenworth, Mack, Freightliner, Western Star, Mercedes, DAF, Scania, Volvo. Power Pro 7.5 Heavy Duty range of starters for Case Loaders, Caterpillar Heavy Industrial, Mercedes and Volvo M9R Range to suit BCI, Higer, SDLG Wheel Loaders.

PowerPro® 7 series starters integrate premium technologies into a powerful and highly robust in-line gear reduction unit. Each PowerPro 7 series starter offers superior performance in over-the-road and heavy duty engines up to 16L and include Prestolite's Integral Magnetic Switch (IMS)/ Soft Start Relay technology to help eliminate voltage drop issues by minimizing wiring between the relay and solenoid.

- 12V 7kW starting power
- Weighs less than 30 lbs. (Under 13.6 kilos)
- Designed for heavy duty diesel engines up to 16L
- Integral Magnetic Switch (IMS) soft start relay
- Improved commutator with larger copper cross section
- Enlarged armature which reduces air gap losses
- Heavy duty, solid copper brush plate to help improve performance through better conductivity
- Advanced eCoating to protect housing from corrosion

PowerPro® 7.5 series starters were engineered specifically for medium and heavy duty engines up to 16L. PowerPro 7.5 series starters include Prestolite's Integral Magnetic Switch (IMS)/Soft Start Relay technology to help eliminate voltage drop issues by minimizing wiring between the relay and solenoid. The series also includes a sealed noseless design to improve service life. A rotatable flange design is available, helping to increase coverage options and lower inventory/stocking requirements.

- 24V 7.5kW starting power
- Weighs less than 29 lbs. (Under 13.2 kilos)
- Designed for medium and Heavy Duty diesel engines up to 16L
- Integral Magnetic Switch (IMS) soft start relay
- Dynamic rotatable flange available
- Sealed, impervious noseless design

PowerPro® 5 series starters - engineered to provide starting power for 11L engines – includes features like Prestolite's Integral Magnetic Switch (IMS)/Soft Start Relay technology to eliminate ring gear damage. Each PowerPro 5 unit includes a rotatable flange and mag switch, easing stocking/inventory concerns while increasing application use. The PowerPro 5 starter coverage includes engine models from Caterpillar, Cummins, Detroit Diesel, International, John Deere, Mack and Perkins.

- 12V 5kW starting power
- Weighs less than 29 lbs. (Under 13.2 kilos)
- Designed for medium and heavy duty diesel engines up to 11L
- Integral Magnetic Switch (IMS)/Soft Start Relay technology
- Rotatable flange and mag switch
- Sealed noseless design
