

BATTERY MASTER SWITCHES

Heavy Duty Battery Master Switch

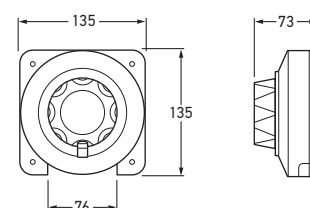

2765

Enables switching between battery 1 and 2 or linking up of both batteries for extra power. May also be used as a manual isolator for charging batteries.

Max. Load 175A at 12V DC Continuous
87.5A at 24V DC Continuous

Function 4-position switch (off-1-2-both)

Dual Battery Master Switch - Weatherproof

2767

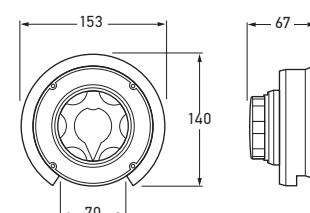

For 6-36V DC battery systems with alternators or generators. Water and vapour resistant.

Max. Load 500A at 12V DC for 10 seconds
250A at 24V DC for 10 seconds
310A at 12V DC continuous
155A at 24V DC continuous

Mounting Surface mount or 84mm diameter opening.

Function 4-position switch (off-1-2-both).

For Panels Up to 25mm thick.

Battery Master Switch

4640

For cars and medium trucks. Complete with removable knob.

Voltage 48V DC (max)

Max. Load 1250A at 12/24V DC for 10 seconds (cranking)
455A at 12/24V DC for 5 minutes (intermittent)
275A at 12/24V DC continuous

Mounting Surface or flush mount (52mm diameter opening)

Termination 2 x 10mm studs

Protection IP56.

Spare Part 4641 Knob
