DIRECT FIT LED GLOBE KITS

The new LV Automotive Direct Fit LED Globes are a fantastic solution when looking to replace standard halogen headlight globes in vehicles.

These offer high performance at 3200 Lumens with a colour temperature of 6500K, which means they are a brilliant white light on the road. Giving the driver a much safer and easier experience when driving at night. But not only that will give your car a nice modern clean look too.

This new range of LED globes are constructed so that they are the same or similar size to the original halogen globe taken out meaning that they are a direct fit. They also have the same plug built in meaning that there are no wiring modifications required making them a plug & play system.

They are available in 7 different popular globe types and are supplied as a twin pack.

BEFORE AND AFTER COMPARISON

Original Halogen Globes

Direct Fit LED Globes

COMPANION ITEMS: ELECTRONIC AND RESISTOR CANBUS CANCELLERS

When fitting these LED globes to a vehicle with CANbus this may bring up a warning light on the dash, LED globe not to work or even flicker.

If this happens then you will be able to trick the computer in thinking that you still have a globe in the system. By using higher current by fitting either of these two types of cancellers.

PRODUCT INFORMATION

Part No.	Descriptions	Pack
LV9320	12V H4 Electronic CANbus Cancellers	2
LV9321	12V H7 Electronic CANbus Cancellers	2
LV9324	12V H8 / H11 / H16 Electronic CANbus Cancellers	2
LV9326	12V HB3 / HB4 / H10 Electronic CANbus Cancellers	2

Part No.	Descriptions	Pack
LV9322	12V H4 Resistor CANbus Cancellers	2
LV9323	12V H7 Resistor CANbus Cancellers	2
