

PRODUCT RELEASE

WIRELESS DIGITAL LINKS

New to the accessories available for the JAS reverse camera systems is the digital wireless links.

These links allow a connection between a compatible JAS camera to the monitor without running lengths of cables.

The sender is digitally locked to the receiver allowing multiple links to function within the same area without interference.

Receiver Input Voltage:	12V (Monitor Power Feed)
Sender:	12/24V
Optimal Operating Range:	0-20M (up to 120M)
Frequency:	2408 - 2472.5 MHz
Compatible Systems:	Single Screen/Quad Screen

PRODUCT INFORMATION

Part No.	Barcode
E65-1026	9342828111577

Note: Camera cable with a threaded DIN connector will require adaptor.

REVERSE SENSOR MODULES

Further expanding the extra plug-n-play modules on the JAS camera systems is the reverse sensor modules. This reverse sensor module can be integrated into existing JAS systems that once connected with an existing system the screen will display a reverse area to which the sensors are operating.

Voltage:	10 - 32V
Cable Length:	3.0M
Sensor Range:	0 - 2.4M
IP Rating:	IP68
