

TUNGSRAM™

New Product Release

Megalight Ultra +200 Counter Merchandiser Pack

Up to 200% more light on the road ahead

Expanding on their range of high quality halogen bulb upgrades, Tungram have just launched the ultimate addition to the 'more light' category.

Megalight Ultra +200 bulbs set a new level in halogen headlight bulb performance, offering up to 200% more light on the road in the areas you need it, compared to a standard halogen bulb.

Not only does the Megalight Ultra +200 increase the viewable distance down the road but drastically improves visibility to the side of the road, something incredibly important when driving on dark roads to help avoid pedestrians, animals or road debris.

Approved for road use (ADR) and available in a wide variety of bases, this new range of bulbs is unmatched in performance and price.

The counter merchandiser pack comes with 1 pack each of H4, H7, H11 & HB3 bulbs.
