

12V Super Slim Lithium Series - 150AH

Description

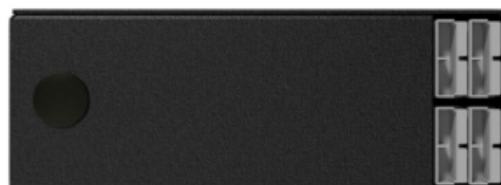

The light weight 150Ah capacity Super Slimline Lithium (SSL) battery from REMCO is constructed using the latest generation prismatic lithium iron phosphate cells. At just 85mm thick the 150ah slim variant is designed to go where more power is required but space is still tight.

The RM12-150LFPXSL contains an inbuilt Battery Management System (BMS) that provides up to 200A of continuous discharge, can accept up to 140A of charge and can be placed in parallel to cater for higher power and greater capacity.

The strong aluminium casing provides extra durability and performance for advanced battery systems.

Features

- Internal 200A BMS
- Strong powder coated aluminium enclosure
- Lightweight 17.7kg 150Ah battery
- Compact shape and size
- 4 x grey Anderson (Max 50A each)
- Mounting bracket kit included

SPECIFICATIONS

Model	RM12-150LFPXSL
Capacity Nominal	150Ah
Voltage Type	12.8V
Voltage	LiFePO4 Charge
Charge Current	13.8V - 14.6V max 140A max
Discharge Current	200A/400A peak
Low Voltage Cutoff	10.5V
Operating Temp	0-45°C
Weight	17.7kg
Life at 80% DoD	2,000cycles
Life at 50% DoD	5,000 cycles
Size (LxDxH)	560X235X85 mm
Warranty	4 years
