

THE POWER OF

REDARC®

ALPHA150

LITHIUM BATTERY

NEW PRODUCT RELEASE

Discover the unrivaled power of REDARC's new Lithium Alpha150 150AH Battery.

With a lifespan of over 5,000 cycles, it outperforms most lithium batteries and lasts 10 times longer than equivalent deep cycle AGM batteries. The massive 200A discharge current enables the Alpha150 to power inverters up to 2000W from a single battery, optimising space, and minimising weight.

Onboard Bluetooth delivers seamless battery level monitoring via your connected mobile device, while the built-in heater ensures reliable charging even in sub-zero temperatures.

Manufactured in the Netherlands and supported by a 5-year warranty, the new REDARC Lithium Alpha150 battery sets the benchmark in 12V lithium power.
