| It No | Parameter                                         | Details                    |
|-------|---------------------------------------------------|----------------------------|
| 1     | Cooling Capacity (nominal) @35°C ambient          | 5kW                        |
| 2     | Heating Capacity                                  | 4kW                        |
| 3     | Overall dimensions (excl FA spigot & end bracket) | 750(L) X 650 (W)X365(H) mm |
| 4     | Nominal Voltage                                   | 24VDC                      |
| 5     | Supply Airflow                                    | 150 l/s                    |
| 6     | Current Draw (Max) @24VDC                         | 18 Amps                    |
| 7     | Suction Fitting                                   | #10 MIOR                   |
| 8     | Discharge Fitting                                 | #8 MIOR                    |
