

PRODUCT RELEASE

E65-1043 4 Pin Cable Adaptor 150mm Changes mirror image to normal image

Barcode: 9342828153331

In most cases, Rear View Cameras by default display a mirror image on the screen. This adaptor is used to switch rear view camera from mirror image to normal image. It's mainly used when operator wants to use the rear view camera for forward viewing. Adaptor is connected in-line (one end to the camera and the other end to the cable)

*** Note: This cable Adator is designed to work with selected RVC's only, and the one which is compatible to it in our range is E65-1021**
