The REMCO AGM Deep Cycle range uses thicker and heavier plates than other conventional batteries, making it purpose-built for cyclic use and deeper discharge recovery.

Our Deep Cycle range promise reliable and long-lasting power, making it ideal for recreational and commercial applications. Rest assured that your REMCO can handle the demanding requirements of repeated deep cycle discharge, so that you can harness the energy to explore.

### Key advantages of REMCO AGM Deep Cycle

- Trusted performance — endorsed by Australian Caravan OEMs
- Superior construction — greater cycle life vs conventional batteries
- Flexible mounting — spill-proof multi-position fitment
- Longer shelf-life — vs conventional batteries
