

SINGLE PACK

## LV1884

### 12V 10W MONOCRYSTALLINE PORTABLE SOLAR PANEL

- Voltage: 12Vdc
- Power: 10W
- Smaller footprint & high efficiency monocrystalline technology
- Fitted with blocking diode to allow direct connection to battery
- 3m Long leads terminated with battery clips
- Robust frame
- Voltage at power max: 17.4V
- Current at power max: 580mA
- Short circuit current: 610mA
- Connection to battery: Battery clips
- Dimensions: 330 x 200 x 83mm
- Weight: 1.15kg

**Note: Recommended to use a charge controller to avoid overcharging of battery when panel output exceeds routine circuit load.**

## LV1881

### 12V 100W MONOCRYSTALLINE SOLAR BLANKET WITH CHARGER

- Voltage: 12Vdc
- Power: 100W
- Highly efficient monocrystalline technology
- Includes carry bag with storage pocket, 5m battery clamp cable & 10A/12V smart PWM controller for charging protection
- Panel dimensions: Unfolded 1720 x 664 x 6mm, Folded 380 x 340 x 80mm
- Weight 5.4kg
- Ideal for caravanning, camping, boating & other outdoor activities
- 2 Year warranty
