

THE POWER OF

REDARC®

INTEGRATED POWER SYSTEM

NEW PRODUCT RELEASE

Introducing REDARC's new Integrated Power System. This all-encompassing system brings together REDARC's trusted power devices into a single, comprehensive unit.

Included in each system is our new 2000W RS3 inverter for powering appliances and Manager30 and RedVision display for reliable battery management and monitoring duties.

With all components securely pre-assembled, pre-wired and mounted on a durable powder coated metal chassis, installation is a breeze — simply mount and connect your power source.

The system seamlessly integrates into vehicle canopies and offers a streamlined power experience, making it the ultimate power companion for remote travel.
