# POWERDOCK TO TERMINAL BLOCK WIRING KIT

NEW **PRODUCT RELEASE**

The PowerDock to Terminal Block Wiring Kit provides the parts necessary to connect the dock terminal to a terminal block behind the PowerDock installation. This makes wiring from the vehicle and solar a breeze as the terminal block requires only an allen key to complete installation.

The PowerDock to Terminal Block Wiring Kit is perfect for those replacing an existing battery installation with a GoBlock or for customers who wish to supply their own wiring.
