

THE POWER OF

REDARC

RS3 INVERTERS

NEW PRODUCT RELEASE

REDARC's new RS3 inverters are here, the go-to solution for powering the essentials while off-grid.

These new pure sine wave inverters now feature Automatic Transfer Switching (ATS), switching smoothly between inverter and shore power and streamlining installation. Their whisper quiet operation enables users to immerse themselves in the tranquil outdoors without the intruding fan noise.

With IEC connectors and built-in Residual Current Device (RCD), integration is seamless and compliance with strict local standards guaranteed. While their improved surge capacity provides more power to power hungry devices during start up.

Available in both 12V and 24V across 1200, 2000 & 3000W capacities, REDARC's RS3 range is the smart choice in inverter power.

R-12-1200RS3	1200W 12V Inverter with ATS and RCD
R-12-2000RS3	2000W 12V Inverter with ATS and RCD
R-12-3000RS3	3000W 12V Inverter with ATS and RCD
R-24-1200RS3	1200W 24V Inverter with ATS and RCD
R-24-2000RS3	2000W 24V Inverter with ATS and RCD
R-24-3000RS3	3000W 24V Inverter with ATS and RCD
