COMMERCIAL 7" QUAD DISPLAY WIRELESS REVERSE CAMERA KIT SURFACE MOUNT

The LV7150 is a Commercial Grade Wireless Camera System, built for reliability in tough environments. With an impressive 300-meter range, you'll enjoy a strong, clear video feed between the camera and monitor.

The system also features a Quad View Display, allowing you to monitor up to four cameras at once for complete coverage. It operates on a flexible 9-32V voltage range, making it easy to connect to various power sources. Designed for durability, this camera has an IP69K rating, providing full protection from dust and high-pressure water. With a 120-degree viewing angle, you get a wide field of view, making it perfect for commercial use.

This system offers the range, durability, and convenience you need to keep your vehicle or fleet protected.
